### FOR IMMEDIATE RELEASE

# CHARTCARE Innovates with Linux – Reduces EMR Costs for Physicians

**NEW YORK**, June 2, 2009 – CHARTCARE, Inc. is pleased to announce that its proven Electronic Medical Records (EMR) solutions are now available on the Red Hat Enterprise Linux platform. Traditionally certified on the powerful IBM System p (AIX) servers, offering CHARTCARE's solutions on the Linux platform (IBM System x servers and others) will cost physicians significantly less.

The culmination of this development project now allows CHARTCARE to offer its EMR solutions at a dramatically reduced cost for any size medical practice. Recent development efforts with Red Hat Enterprise Linux, the leading commercial-strength open source operating system, provide physicians and IT managers with the means to improve operational efficiencies and flexibility throughout their computing infrastructure.

Certified by the industry's major hardware and software vendors, Red Hat Enterprise Linux offers a flexible, high-performance operating system environment. Red Hat Enterprise Linux scales from desktop and laptop systems, small to mid-size servers, to the largest SMP servers and to mainframes.

Devin Nate, CHARTCARE's Manager of Technical Services, stated "With virtualization technology coupled with the power of Red Hat Enterprise Linux, CHARTCARE allows you to maximize your resources and increase deployment flexibility and application responsiveness. Think of a complete EMR solution with the flexibility to be installed on a single laptop and also to be scaled up to the largest data centre."

According to Karim Kanji, President of CHARTCARE, "I am very excited about this new development for our Company and our Customers. The fact is that we can now reach a customer base that we once thought was not reachable. We are transforming our Company and giving the market what it wants – our world-class EMR applications with our proven performance, scalability, industry standard security, and stability at an unbeatable value. Now that CHARTCARE software is available on hardware running Linux, this solution costs less than ever before and is now an option for smaller medical groups - even solo and dual physician practices. We guarantee that new Customers joining us and existing Customers undergoing upgrades will make the most of their IT budgets."

CHARTCARE has established a leading position in the North American EMR marketplace and has a very satisfied and loyal following. Building on our successful history of business process experience and know-how, this Linux technology leadership will provide both current Customers and physicians considering Electronic Medical Records with both lower upfront capital and ongoing operational expense.

## **About CHARTCARE**

CHARTCARE, Inc. ([www.chartcare.com](http://www.chartcare.com)) has specialized in software development for the ambulatory physician market since 1984. CHARTCARE's parent company, CLINICARE Corporation, is Canada's leading provider of Electronic Medical Records (EMR) and Practice Management Applications (PMA). CHARTCARE's EMR has been rated as one of the Top 2 EMRs in North America for the past 5 consecutive years by the prestigious IT consulting firm - KLAS Enterprises. CHARTCARE has branch offices in the United States and Canada, with its Head Office in New York, NY.

CHARTCARE continues to deploy a successful enabling technology that stresses a highly secure single patient record across many locations. Their commitment is first to their physician customers, ensuring that they can maximize the advantages of EMR by utilizing a trusted, proven, reliable and customizable model which supports physicians' workflow and can be tailored to meet individual physician needs. It has been proven to enhance patient care, improve patient safety, drive both physician and staff productivity, and lower office overhead.
